True Black Oak wood finish on the laminated chipboard gives the stand a classic look at an affordable priceCompatible with Mainstays baskets and folding baskets are NOT included) Open shelf and 4 lower cubes can hold all your movies, games and video componentsOrganize your entertainment space with the Mainstays Alan Park TV Stand. The stand can accommodate flat screen televisions up to 59? wide or 80 pounds. Made of laminated chipboard, the black oak finish gives the TV stand an up-to-date and modern look that adapts to any style and furnishings. Organize your soundbar and DVD player on the large open shelf and keep your gaming systems, cable boxes, and DVDs or games organized in the 4 cubbies open. Add fabric containers to the cubbies to create a hidden deposit (not included). The punch out wire management holes are great for keeping the cables tangles free, but only where you need them. Open shelves will prevent overheating of components allowing proper circulation of the air. Finish your stay with more Mainstays items (each sold separately). The TV stand is shipped flat to your door and requires assembly at the time of delivery. It is advisable to bring two adults together. Once assembled, the stand measures 19.61?H x 47.48?W x 15.67?D. Item weight: 60 lbs. Package size: 53âL x 16.56âL x 4.44âH.Mainstays 4 Cube TV Console Up to 59', True Black Oak: True Black Oak wood finish on laminated chipboard Give the Stand a classic look for an affordable price Compatible with Mainstays folding containers & basket bins (Bins are NOT included) Open shelf and 4 lower cubbies can hold all your movies, games and video components Punch out wire management holes gives you cable organization where you need it Flat ships at your door; 2 adults are recommended to mount Stand can hold a TV up to 59 awide or 80 pounds; shelves can hold 50 pounds; shelves can hold 50 pounds; and each cubby holds 20 pounds Assembled dimensions: 19.61 aH x 47.48 aW x 15.67 aD BrandMainstaysManufacturer Article number 1 851 335 WFinishBlackMaterialComposite woodColourBlack OakMaximum screen

Floor TVs When it comes to floor TVs, we offer a wide range of styles and designs to choose from. A TV console with exposed legs can be a nice addition to your furnishings if you combine colours and materials with other details in your room. A legless piece can give a more solid and unified touch to your room, as the legs do not disturb the view. Both

types of units offer storage solutions and can handle the weight if you have a larger TV. Wall unit creates a clean and minimalist look. It's even easier to suck underneath; just a quick scan and you're done. But here you have to consider what kind of wall you are planning to mount it on, since the wall itself has to support the weight of

the cabinet. Especially if you're going to put the TV on top of it. If this concerns you, we recommend that you mount the TV to the wall with a wall bracket, and simply use it for storage or styling. Combined solutions If you're desperate for space, why not opt for cabinets above and below the TV for maximum capacity? There's enough space for your home cinema system and digital boxes, and you can add your own personal touch with accessories and home decorations. A combo solution like this can also help frame the TV if you have a larger model. It can create an elegant wall installation that is just as eye-catching with the screen off. Open or closed TV cabinets? Some of our TV stands have open shelves, while others hide the closet behind the closet doors. Depending on what you want to display, you can go for one or the other. If you have suitable accessories for managing cables), then open shelves may be a good option. That way, you can show your Internal details. Open shelves are also a good idea if you're playing video games, as the game console may need space for ventilation to avoid overheating. If your cables and are visible, a unit with doors might be a good idea. That way, you can just hide them and pretend they don't exist. It'll also give you the chance to hide your digital boxes and such if you don't want to show them off. Just remember, not all units can handle the signal from a remote if the cabinet door is in the way. And youâ Il have to open the door when youâ re video games. 10B341 851 335W0015/19 Attach the Top (E) to the left panel (A), right panel (B), and top partitioning (C), and the cam tighten locks.all finished edges are facing upwardstodos los Bordes acabadas Estée n mirando hacia arribaLOCKAPRETARTitusx42AB topLOCKAPRETARTitusx42ABEC
